NATIONAL CERTIFICATE (VOCATIONAL)

COMPUTER PROGRAMMING (Second Paper) Practical NQF LEVEL 4

SUPPLEMENTARY EXAMINATION 2011

(10041024)

**25 March (Y-Paper)
13:00 – 17:00**

This question paper consists of 10 pages.

<p>TIME: 4 HOURS MARKS: 100</p>

INSTRUCTIONS AND INFORMATION

1. Answer ALL the questions.
2. Read ALL the questions carefully.
3. Number the answers according to the numbering system used in this question paper.
4. Write neatly and legibly.

INSTRUCTIONS TO STUDENTS AND LECTURERS

1. Students must be seated in the computer laboratory 30 minutes before the start of the examination to ensure that all computers have the appropriate programs.
2. These questions will be done on the computer by making use of MS Office 2003 and VB.NET 2005 or VB.NET Express or VB.NET 2008.
3. **Students must make sure that they print their work immediately after completing a question. Ensure that your examination number appears on each print out. NO QUESTIONS WITHOUT A PRINTED EXAMINATION NUMBER WILL BE MARKED.**
4. In the event of a power failure or a computer or printer breakdown, the invigilator will make the necessary arrangements for students to continue and the actual time lost will be given to them once they resume working.
5. All work on the computer should be saved at regular intervals to prevent loss of work in the event of a power failure. NO additional time may be allowed for such lost work.
6. **No student may print his/her work for another student, or make a memory stick available to another or access another students' work on the network. Any attempt to access any information from or transfer information to another student in whatever manner is a contravention of the examination rules and regulations and will be viewed in an extremely serious light.**

7. All printouts or screen prints done during the session **MUST** be handed in.
 8. Make sure that your **EXAMINATION NUMBER** appears on all pages.
 9. Students may **NOT** copy the Source Code of VB.NET to MSWord and then print it from the Word Processor.
 10. Steps to make a **SCREEN DUMB**:
 - i. Run the solution.
 - ii. Hold the ALT key and press PRINT SCREEN (This will copy the active screen).
 - iii. Open the MS Word program in Windows and PASTE the SCREEN.
 - iv. Add your **EXAMINATION NUMBER** to the top right-hand side of your screen.
 - v. Print from here.
 11. You are allowed to make use of the Help files on VB.NET.
 12. Candidates may use the following programs to create a Web Page:
 - NETBEANS
 - BLUE VODA
 - DREAMWEAVER
-

QUESTION 1

A student at your college wishes to attend the next football world cup. He needs to get all of his affairs in order so that he can be ready for it.

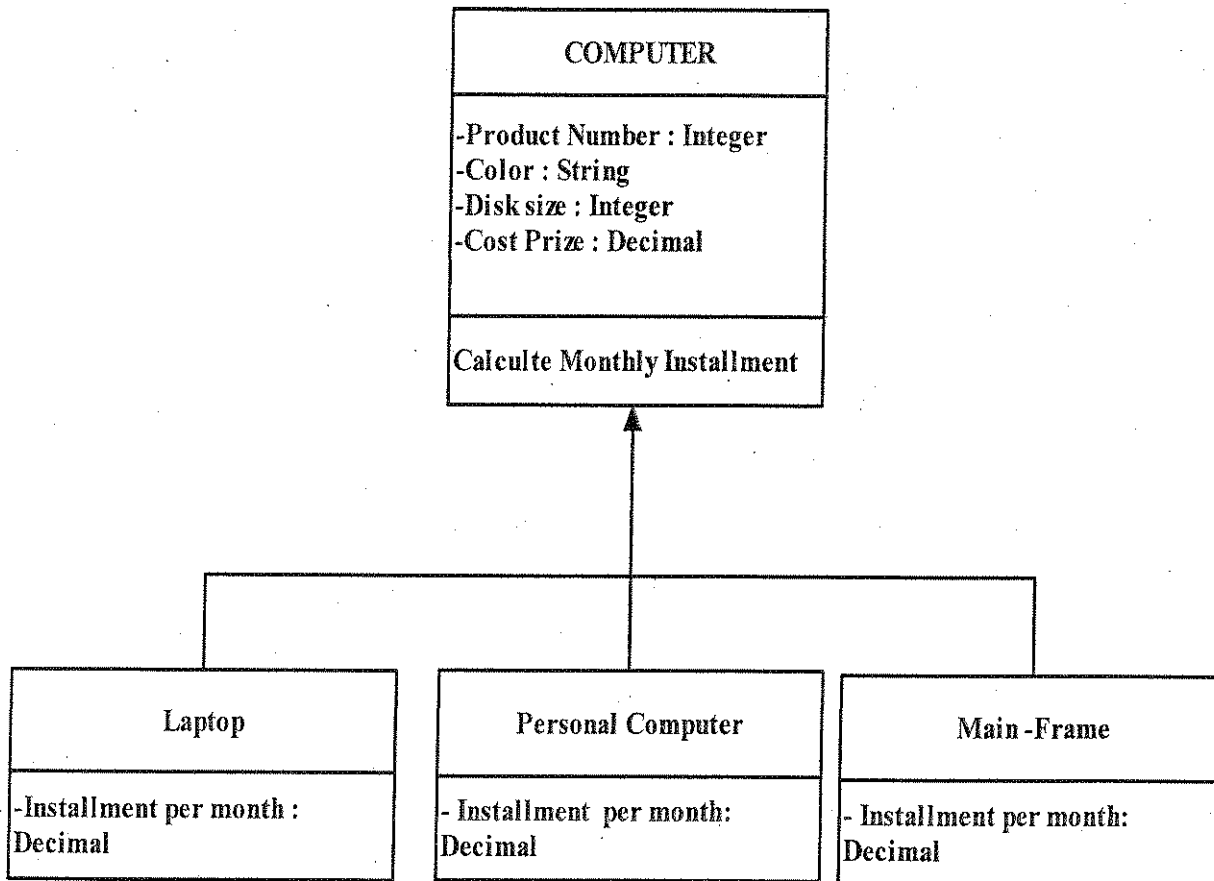

To attend the world cup he must have a passport and at least R10 000.00 pocket money. Because he is underage he must be accompanied by an adult travelling partner. He wants to get sponsors from the local business community and his family. The world cup lasts for a whole month and he needs permission from the college principal for not attending classes.

Open the folder **C:\CP LEVEL 4 SUPPLEMENTARY 2011 PRACTICAL\GRAPHICS** on the hard disk and make use of the graphics in the graphic folder to design the storyboard. Your design should not be more than 5 slides.

- 1.1 Each slide should have a heading/explanation as well as an appropriate graphic. (10)
- 1.2 Insert your examination number as a footer on each slide.
- HINT: View/Header and Footer/Footer/Apply to all. (1)
- 1.3 Save the storyboard as STORY1 and print the slides as handouts, 6 per page, portrait.
- HINT: File/Print/Print what: Handouts/Slides per page = 6, Portrait. (1)
- [12]**

QUESTION 2: VB. NET: OOP

Develop a program that will implement the concept of inheritance using the classes given below:

Load the VB.NET solution from the following directory:

C:\CP LEVEL 4 SUPPLEMENTARY 2011 PRACTICAL\ CP LEVEL 4 OOP Q FEB 2011

2.1 Insert your examination number as a comment in your code. (1)

2.2 Code for the super class.

The price of a computer is calculated as follows:

Price of a Computer = R4500

Price of a Laptop = Computer + R50

Price of a Personal Computer = Computer + R60

Price of a Mainframe = Computer + R200

Instalment = (Total Cost / 12)

(8)

- 2.3 Code for the sub classes. (9)
- 2.4 Add the code that will calculate the monthly installment of a laptop over 12 months using the same information provided in the screen shot below:

-Computer Sales: Exam Number:

Computer Details

Product Number: PER25000

Colour: BLACK

Disk Size: 180

Cost Price: 4500

Monthly Installment and Description of product

Installment for BLACK Laptop with disksize 180 Gig = R 435.00

☐ Laptop ☒ Personal Computer ☐ Mainframe

Calculate Installment VISA

- 2.5 Insert your examination number in the title bar of the form and make a printout of the form. (1)
- 2.6 Code the *Clear* button to clear all input controls and move the focus to the Product Number field. Set the Laptop *Radio* button as the checked button. (4)
- 2.7 Code the *Exit* button. (1)
- 2.8 Make a printout of the source code and save it. (1)

[32]

QUESTION 3: DATABASE**BACKGROUND INFORMATION**

SA Home Theatre Systems is a new company in your area that sells home theatre systems. They are currently using a program that was designed by another company, to access their customer information stored in a database called Customer Information.

The program is already linked to the database but the main problem is that staff of Home Theatre Systems' cannot update, delete or enter new customer information in the database. Another problem is that the program does not display monthly installments due by their customers. The SA Home Theatre Systems management has approached you to solve these problems for them.

Open the folder:

C:\CP LEVEL 4 SUPPLEMENTARY 2011 PRACTICAL\CP LEVEL 4 DB Q FEB 2011

Your folder should have the following files saved in it.

Database file: Cust_Info.MDB

VB.NET Solution: Home Theatre systems

Below is a screen print of what the interface looks like:

The screenshot shows a Windows application window titled "Installment Calculator: Exam Num:". Inside the window, there is a section titled "Customer Detail" which contains two columns of input fields. The left column includes "Order Number:", "Customer Name:", "Customer Address:", and "Phone Number:". The right column includes "Theatre Type:", "Cost Price:", "Amount Paid:", and "OutStanding Balance:". Below the input fields, there are several buttons: "Calculate Installment", "Save Changes Made", a large box labeled "Monthly Installment", "CLEAR FIELDS", and "EXIT PROGRAM".

Open the VB.Net solution and add the following.

- 3.1 Change the text in the title bar of the form to contain your examination number.

(1)

- 3.2 Make use of the OLEDB – binding method to bind all the *text boxes* in your form with the corresponding fields in your Customers Information table. (4)
- 3.3 Add the navigation bar at the bottom of the form. (1)
- 3.4 View your Data Sources; make a screen dump showing all the data sources and make a printout. (2)
- 3.5 Add the code that will calculate monthly installments for all customers. (3)
- HINT: Monthly Installment = Outstanding Balance/12 months. (3)
- 3.6 Run your program and navigate through to the THIRD customer in a database using the binding navigator component on your form. Calculate the monthly installment for this customer. (1)
- HINT: The binding navigator should display record 4 of 4. (1)
- 3.7 Make a printout of the form. (1)
- 3.8 Code the *Save Changes Made* button. Your coding should include the following: (1)
- HINT: Make use of *Try. Catch*
- 3.8.1 If the changes to the record were not successful, a Message box should warn the user of this. (4)
- 3.8.2 If the changes to the record were successful, a MessageBox should inform the user of this. (4)
- 3.9 Code the *Exit Program* button. The user should get a verifying message to confirm his choice. (4)
- 3.10 Code the *Clear fields* program button. (2)
- 3.11 Add your EXAMINATION NUMBER to the source code and make a printout of the source code. (1)

[28]

QUESTION 4: HTML

S.A. Home Theatre system is going online. Develop the following web page as given below using HTML, CSS in JAVA Script Technologies.

The screenshot shows a Windows Internet Explorer window with the title 'Your examination number - Windows Internet Explorer'. The address bar shows 'C:\Users\thobza\Desktop\Login form.html'. The page content includes a heading 'LOG-IN FORM' and three input fields labeled 'YOUR USERNAME', 'PASSWORD', and 'CONFIRM PASSWORD'. Below these fields is a 'Cancel' button and a link 'Click here to login'. The status bar at the bottom shows 'Done', 'Computer | Protected Mode: Off', and '100%'.

- 4.1 Insert your examination number as the title of the web page. (1)
- 4.2 The background color of the page is sky blue and the heading "LOG-IN FORM" is left aligned. (2)
- 4.3 The form must accept the following: USERNAME, PASSWORD AND CONFIRM PASSWORD.
The *Cancel button* must clear the user input.
One link that should direct you to the HOME PAGE that appears below:

(11)

- 4.4 The background color of this page is sky blue. (1)
- 4.5 The font color for the heading is white. (1)
- 4.6 Create a table and add all information as shown on your screen shot above. (2)
- 4.7 Create an unordered list of the items in a table as shown on the screen shot. (8)
- 4.8 Make a printout of all the screens. (1)
- 4.9 Make a printout of the source code. (1)

[28]**TOTAL: 100**
